

## **Develop a User Interface for an Online Banking Application**

### **Implemented the restrictions for inputs**

- **National ID / Passport Number(max 20 characters)**

Max 20 characters are restricted in activity\_main.xml as follows;

```
<EditText
    android:id="@+id/nationalid"
    android:layout_width="393dp"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="National ID / Passport Number"
    android:inputType="textFilter"
    android:maxLength="20"
    android:singleLine="true"/>
```

- **Account Number(max 20 digits, first char non zero)**

Max 20 digits are restricted in activity\_main.xml as follows;

```
<EditText
    android:id="@+id/accountnumber"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="Account Number"
    android:inputType="number"
    android:maxLength="20"
/>
```

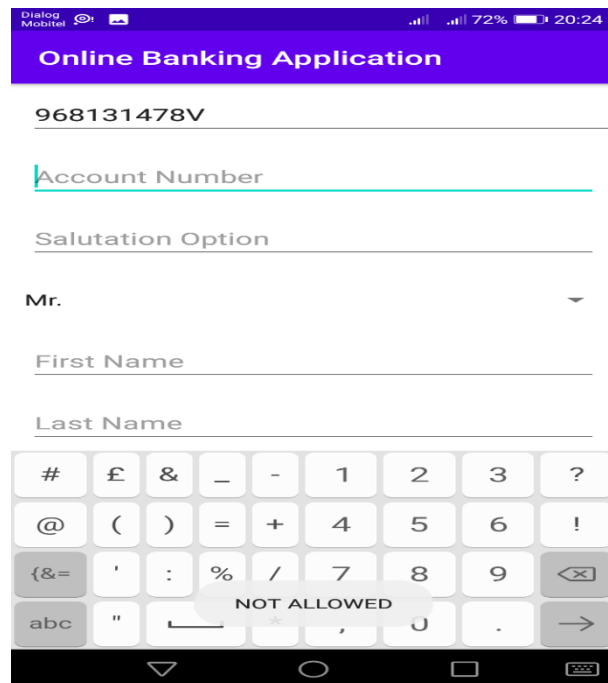

First char non zero are restricted as follows in Main Activity

```
//first element should not be zero
e2.addTextChangedListener(new TextWatcher(){
    public void onTextChanged(CharSequence s, int start, int before, int count)
    {
        if (e2.getText().toString().matches( regex: "^0" ) )
        {
            // Not allowed

            Toast.makeText(getApplicationContext(), text: "NOT ALLOWED", Toast.LENGTH_LONG).show();
            e2.setText("");
        }
    }
    @Override
    public void afterTextChanged(Editable arg0) { }
    @Override
    public void beforeTextChanged(CharSequence s, int start, int count, int after) {}
});
```

### Screen Output :

When entering first value as zero to the account number it give “not allowed”message

- **Salutation option (Mr./Mrs./Prof./Dr./Rev./Other) and if user select other (10 Alpha)**

Code is written in in activity\_main.xml as follows;

```
<EditText
    android:id="@+id/salutation"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="Salutation Option"
    android:digits="abcdefghijklmnopqrstuvwxyzABCDEFGHIJKLMNOPQRSTUVWXYZ"
    android:inputType="text"
    android:maxLength="10"
/>

<Spinner
    android:id="@+id/spinner"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:hint="Salutation Option"
/>
```

In Main Activity we set the spinner to edit text value and make Others user text to alphabetic max-length 10 characters

```
spinner = (Spinner) findViewById(R.id.spinner);
text = (EditText) findViewById(R.id.salutation);

list = new ArrayList<String>();
list.add("Mr.");
list.add("Ms.");
list.add("Prof.");
list.add("Dr.");
list.add("Rev.");
list.add("Other.");

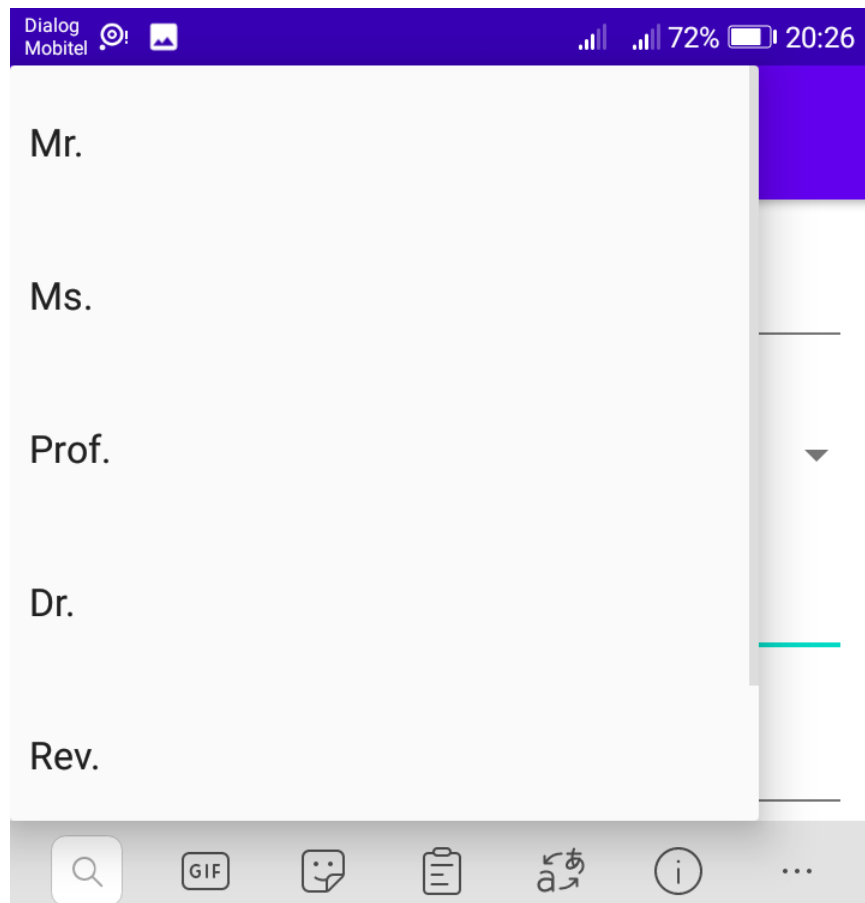

ArrayAdapter<String> adp = new ArrayAdapter<String>
    ( context: this, android.R.layout.simple_dropdown_item_1line, list);
adp.setDropDownViewResource(android.R.layout.simple_dropdown_item_1line);

spinner.setAdapter(adp);

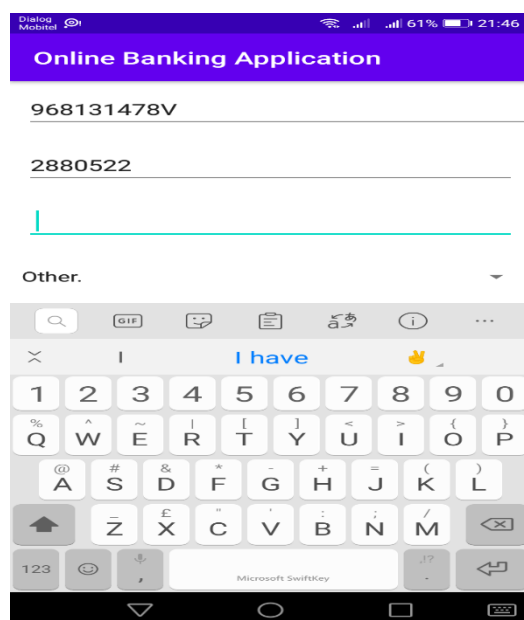

spinner.setOnItemClickListener(new AdapterView.OnItemClickListener() {

    @Override
    public void onItemClick(AdapterView<?> arg0, View arg1,
        int arg2, long arg3) {
        // TODO Auto-generated method stub
    }
});
```

## Screen Output:

When “Other” is selected as Salutation, you can user defined it

- First Name(Alpha.50 characters)

```
<EditText
    android:id="@+id/firstname"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="First Name"
    android:digits="abcdefghijklmnopqrstuvwxyzABCDEFGHIJKLMNOPQRSTUVWXYZ"
    android:inputType="textPersonName"
    android:maxLength="50"
/>
```

- Last Name(Alpha.50 characters)

```
<EditText
    android:id="@+id/lastname"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:maxLength="50"
    android:digits="abcdefghijklmnopqrstuvwxyzABCDEFGHIJKLMNOPQRSTUVWXYZ"
    android:hint="Last Name"
    android:inputType="textPersonName"
/>
```

- Date of Birth (Use Data picker)

In activity\_main.xml,

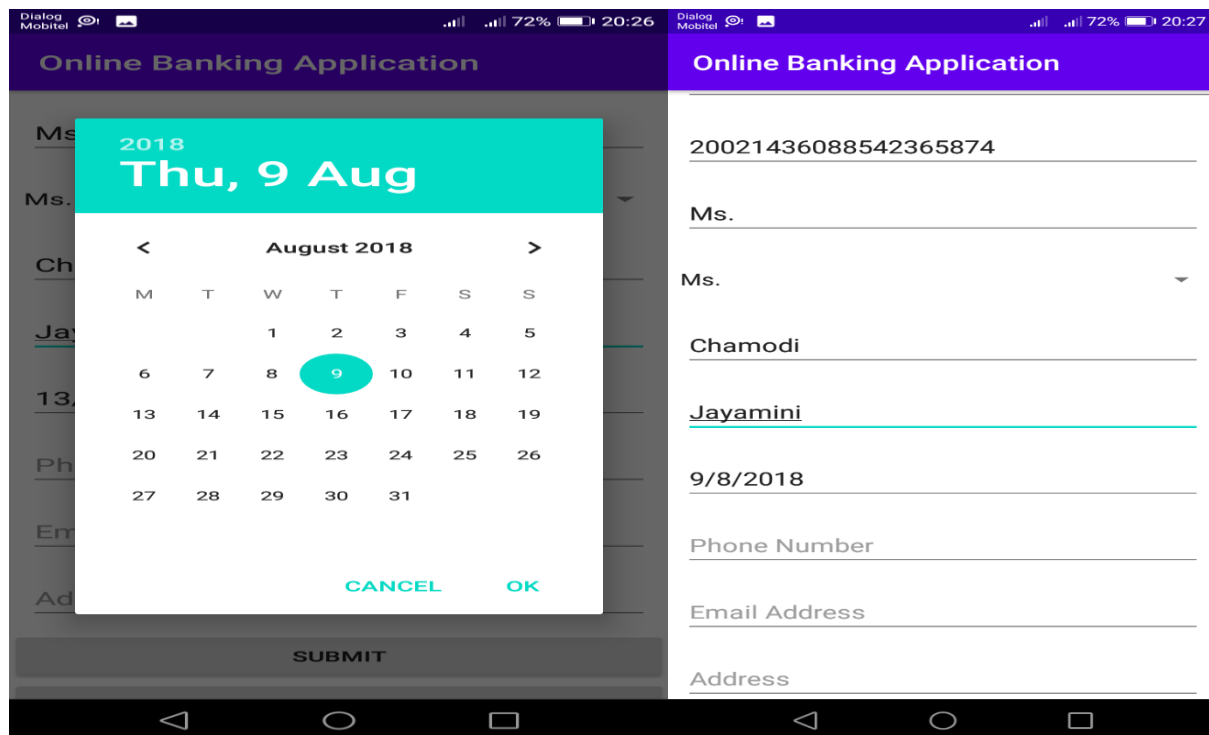

```
<EditText
    android:id="@+id/dob"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:ems="10"
    android:clickable="true"
    android:focusable="false"
    android:hint="Date of Birth"
    android:inputType="date"/>
```

In Main Activity we did not get the future data value set for birthday. It is defined in this code statement.

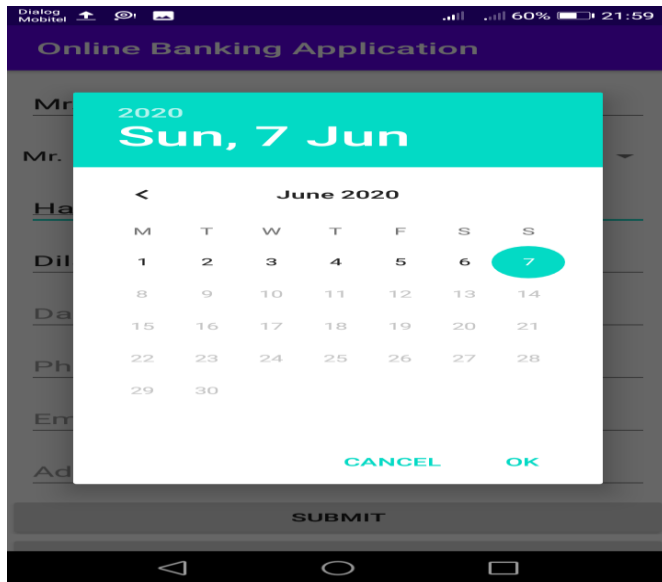

```
e8.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
        final Calendar cldr = Calendar.getInstance();
        int day = cldr.get(Calendar.DAY_OF_MONTH);
        int month = cldr.get(Calendar.MONTH);
        int year = cldr.get(Calendar.YEAR);

        // date picker dialog
        picker = new DatePickerDialog(MainActivity.this,
            new DatePickerDialog.OnDateSetListener() {
                @Override
                public void onDateSet(DatePicker view, int year, int monthOfYear, int dayOfMonth) {
                    e8.setText(dayOfMonth + "/" + (monthOfYear + 1) + "/" + year);
                }
            }, year, month, day);
        picker.show();
        picker.getDatePicker().setMaxDate(System.currentTimeMillis());
    }
});
```

Screen Output of Data picker,

The future values are not valid here,

- **Phone number (Use correct android configuration param)**  
In activity\_main.xml,

```
<EditText
    android:id="@+id/phonenummer"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="Phone Number"
    android:inputType="phone"
    android:digits="0123456789"
    android:maxLength="10"
/>
```

In Main Activity,

```
String emailPattern = "[a-zA-Z0-9._-]+@[a-z]+\\.+[a-z]+";
EditText emailId;

String pattern = "^\\s*(?:\\+?(\\d{1,3}))?[-. (]*(\\d{3})[-. )]*(\\d{3})[-. ]*(\\d{4})(?: *x(\\d+))?!\\s*$";
Matcher m;
DatePickerDialog picker;

Spinner spinner;
EditText text;
```

- Email address (Use correct android configuration param)

```
<EditText
    android:id="@+id/emailaddress"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="Email Address"
    android:inputType="textEmailAddress"
/>
```

- Address(Text 250 character)

```
<EditText
    android:id="@+id/address"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:layout_margin="10dp"
    android:hint="Address"
    android:inputType="text"
    android:maxLength="250"
/>
```

## Validation Method

- Using single validation method in all fields when the submit button is pressed

```
b1.setOnClickListener(new View.OnClickListener() {
    @Override
    public void onClick(View v) {
        if(text.getText().toString().isEmpty()||e6.getText().toString().isEmpty()||e1.getText().toString().isEmpty()||e2.getText().toString().isEmpty()||e3.getText().toString().isEmpty()||e4.getText().toString().isEmpty()){
            Toast.makeText(getApplicationContext(), text: "Fields are empty", Toast.LENGTH_SHORT).show();
        }else {
            if (e6.getText().toString().trim().matches(emailPattern)&& e5.getText().toString().trim().matches(pattern)) {

                builder.setTitle("Confirm dialog Box !");
                builder.setMessage("You want to confirm the input for preceding to another activity?");
                builder.setCancelable(false);
                builder.setPositiveButton( text: "Yes", new DialogInterface.OnClickListener() {
                    @Override
                    public void onClick(DialogInterface dialog, int which) {
                        Toast.makeText(getApplicationContext(), text: "You've choosen to preceding to another activity", Toast.LENGTH_SHORT).show();
                        // startActivity(new Intent(MainActivity.this, MyOtherActivity.class));
                        Intent activity2Intent = new Intent(getApplicationContext(), Activity2.class);
                        startActivity(activity2Intent);
                    }
                });

                builder.setNegativeButton( text: "No", new DialogInterface.OnClickListener() {
                    @Override
                    public void onClick(DialogInterface dialog, int which) {
                        Toast.makeText(getApplicationContext(), text: "You've changed your mind ", Toast.LENGTH_SHORT).show();
                    }
                });
            }
            builder.show();
            // Toast.makeText(getApplicationContext(), "valid ", Toast.LENGTH_SHORT).show();
        } else {
            Toast.makeText(getApplicationContext(), text: "Invalid email address or phone number", Toast.LENGTH_SHORT).show();
        }
    }
});
});
```

If fields are not completed, “Fields are empty” message pop up.

Dialog

Mobitel

Online Banking Application

Salutation Option

Mr.

Address

SUBMIT

Fields are empty

RESET

If input are wrong a message will be popup,

activity\_main.xml submit button event,

```
<Button  
    android:id="@+id/submit"  
    android:layout_width="match_parent"  
    android:layout_height="wrap_content"  
    android:onClick="Submit"  
    android:text="Submit" />
```

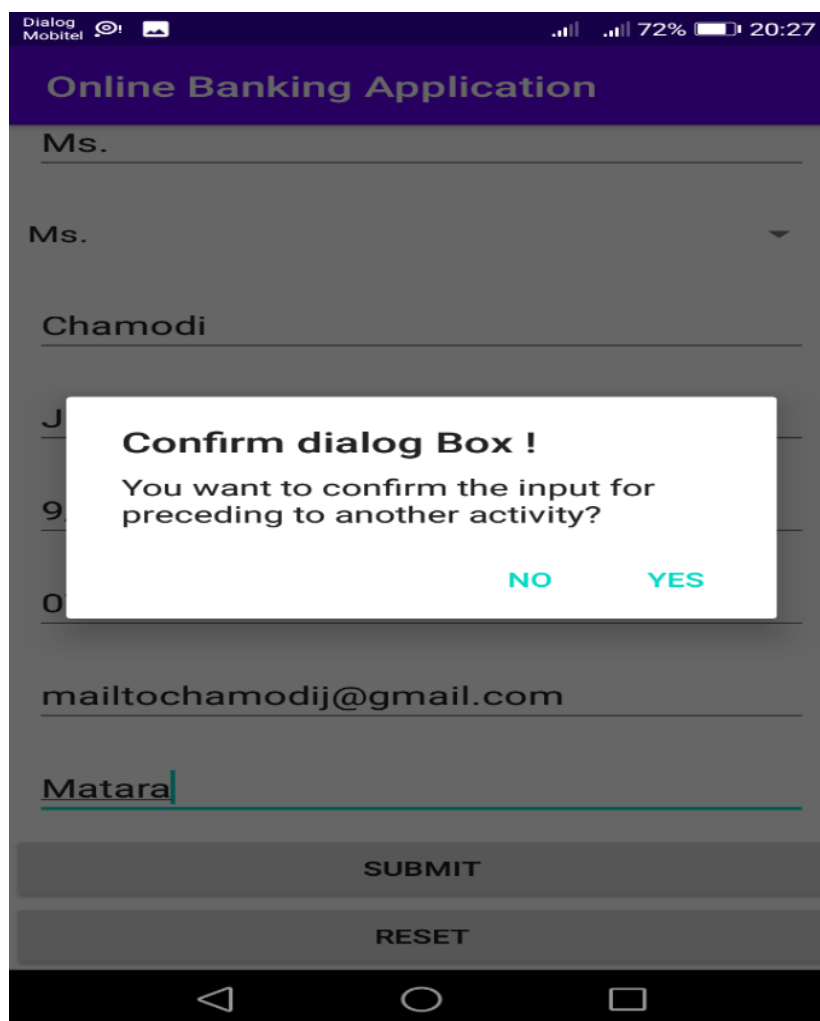

- Everything is cleared by single reset button pressed

```
//clear all text fields  
Button reset = (Button)findViewById(R.id.reset);  
reset.setOnClickListener(new View.OnClickListener() {  
    @Override  
    public void onClick(View v) {  
        e1.setText("");  
        e2.setText("");  
        e3.setText("");  
        e4.setText("");  
        e5.setText("");  
        e6.setText("");  
        e7.setText("");  
        e8.setText("");  
        text.setText("");  
    }  
});
```

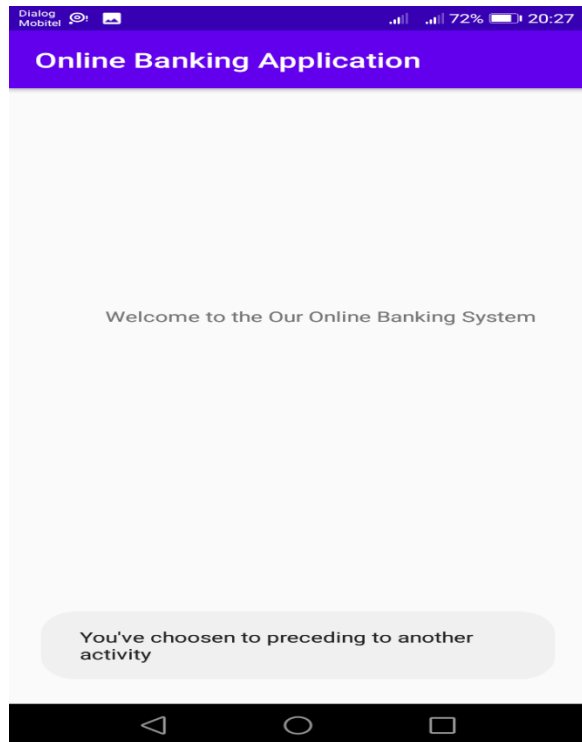

activity\_main.xml reset button event,

```
<Button
    android:id="@+id/reset"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:onClick="Reset"
    android:text="Reset" />
```

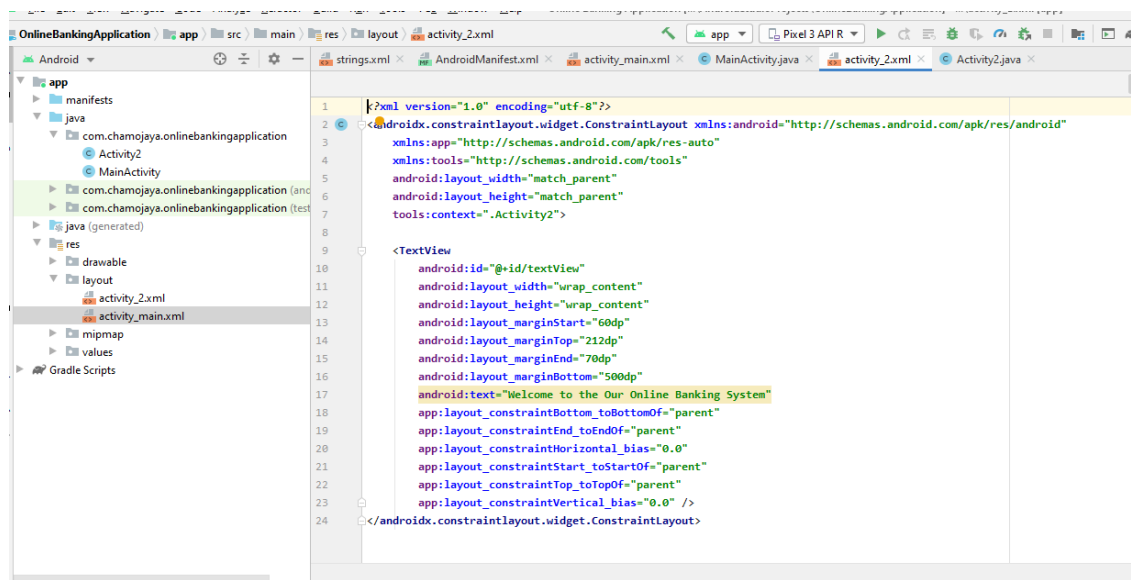

- If there are no errors a confirmation dialog display when submit button clicked

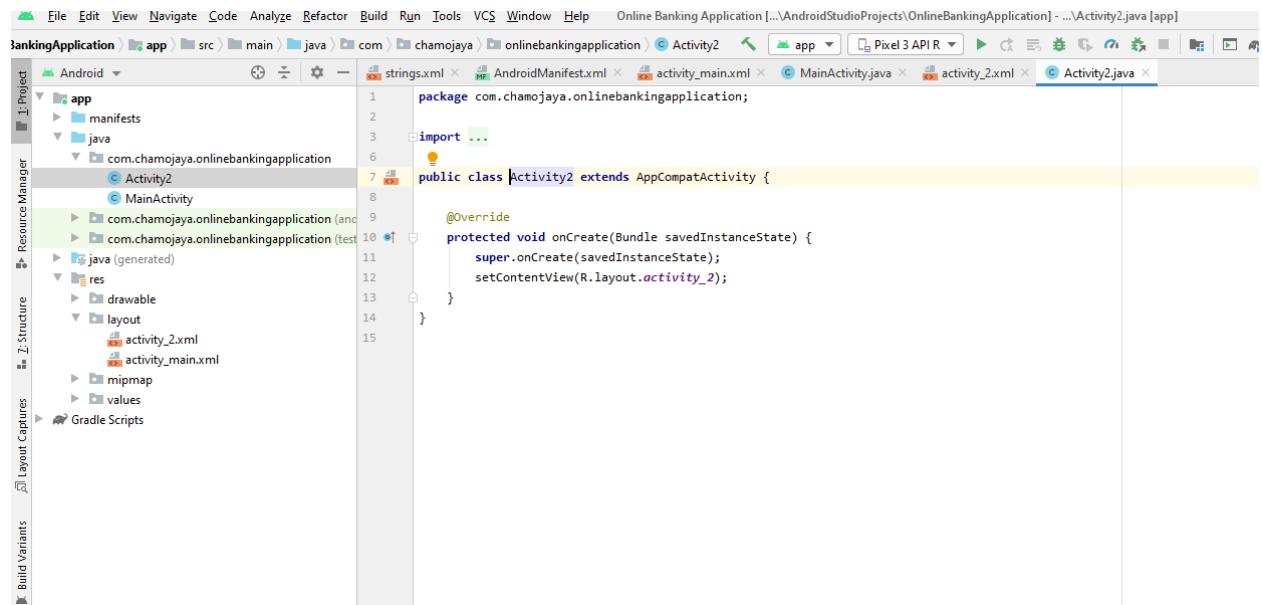

IF yes clicked, a new window came after confirm the inputs with a message “You’ve choosen to preceding to another activity”,

The another activity is proceeding from the main activity,

If No click, a previous window will be refresh with a message “You’ve changed your mind”
